### Abstract

34 Ways to Coca-Cola is a set of 34 walking guides that map, using Google Street View, a route to a Coke in each of the 34 Bristols around the world. Acknowledging the ‘original’ Bristol in the UK’s history in the slave and sugar trade, this project aims to connect all the Bristols worldwide using Coca-Cola. The starting point for each guide is the coordinates given in the Wikipedia page ‘List of places called Bristol’ (Wikipedia, 2014), the end point the nearest petrol station, vending machine or beach café. Transposing the form of the walking guide into a virtual space, this piece draws lines between the histories of slavery, sugar, mapping and place.

### Introduction

Aside from the original Bristol, in the United Kingdom, there are 34 other Bristols around the world. All of these Bristols are in the so-called ‘New World’, delineated and named in the centuries following European colonisation of North, Central and South America. I’ve written *34 Ways to Coca-Cola* as a set of 34 short walking guides that map, using Google Street View and text, a route to a Coke in

each of the 34 Bristols around the world. Acknowledging Bristol, UK's history in the slave and sugar trade, this project aims to connect all the Bristols worldwide using Coca-Cola.

Each guide is a few sentences long, building a series of fleeting Bristol-specific narratives that end with Coca-Cola, and begin with the words 'you will be'. Bristol, UK is a town that came to riches and prominence through slavery and sugar, and sugar and slaves were its globalised commodities. Across the Atlantic in Little Bristol, Barbados, Bristol, Jamaica and Bristol, Georgia slaves planted, cut and rendered the world's sugar cane, while the money and the sugar were funnelled back to the Bristols in the UK and its colonies. Later, the USA distilled the essence of sugar and invented Coca-Cola: the original mass-produced globalised brand.

Each guide attempts to walk you through this history, and this piece draws on, and alludes to, a history of walking as knowing. Rebecca Solnit has described the history of walking as an 'unwritten, secret history whose fragments can be found in a thousand unemphatic passages in books, as well as in songs, streets, and almost everyone's adventures.'<sup>1</sup> She then goes on to demonstrate what walking has produced materially: 'paths, roads, trade routes; generated local and cross-continental senses of place; shaped cities; parks; generated maps, guidebooks, gear...'<sup>2</sup> *34 Ways to Coca-Cola* operates at the nexus of these ideas about walking. It creates a materiality for itself in using the form of the guidebook; it relies on your working knowledge and experience of place, of medians and footpaths and expressways, of the word 'Bristol', of trade routes and alleyways, of shops and diners. But it also tugs at something more intangible, more secret: by using the virtual, it alludes to the imaginary, to the things not recorded by material experience. It relies on you using Google Street View to follow my routes, if you wish. It relies on you knowing that I wrote each guide using Google Street View, using someone else's images, recycled through my imaginary, and into yours. Both this materiality and mystery speak to me of the ways in which places can be made.

In this way, the piece tracks between past and present, between history and virtuality. For the guidebook to function as a plausible tool to map these networks, however, the route through each space needs to follow a strict set of guidelines, otherwise the value, or distance, to a Coca-Cola would become somewhat arbitrary.

I used the same method for each Bristol. Each walk was given its starting point by the coordinates listed in the Wikipedia page "List of places called Bristol".<sup>3</sup> I followed this page very strictly, even making two walks for Bristol, Pennsylvania, because the Wikipedia page had erroneously listed it twice, using slightly different coordinates. Using Google Maps (on Earth view), I would enter

each coordinates for each Bristol. The little red pin [  ] would fall on the map, and I would drag the little yellow pegman symbol [  ] of Google Street View onto the pin, and see where on earth I was. Next was a process of walking, virtually, along highways, dirt paths, central reservations and across gardens in search of the nearest petrol station, convenience store or vending machine. After I located the closest Coca-Cola I would use the 'Directions to' tool on Google Maps to determine the exact distance between the Coke and my starting point.

The rules for generating each image to accompany each walking guide were just as strict. Using Google Maps (on Earth view) I would zoom in on each red pin marker to its closest point. Then I would zoom out by four points, and take a screenshot of this image. In this way, each image of each Bristol holds the same approximate values. As a viewer, it is close enough to get a sense of each landscape: its colours (at the time the image was taken), its contours, its differences. There is a human scale to each image, a walkable-ness; they are not seen from outer space. Something, here, is felt.

This method also revealed the hierarchy of Google Maps imagery for each Bristol: the closest zoom on the Bristols in, for example, Peru and New Brunswick still hovered some way above the terrain, somewhat pixelated, whereas the closest zoom in Bristol, Connecticut revealed each dimple in the tarmac, every discarded bottle on its rooftops. As a result, some of the images have an abstract, painted quality, some look like road maps, some are run through with traffic islands and shadows, with detail. This is important as I generate text and images that try to evoke and describe places I, and perhaps you, have never been.

Writing these guides was a strange experience. Seeing places you've never been through Street View is oddly hypnotic. Sometimes a street changes from summer at one end into winter at the other. I would come across somehow hidden, secret things, revealed partially in the obscurity of my journeys: a sign to Mystery Cave State Park in Bristol, Minnesota; a broken sign that reads A TOPARTS in Bristol, Colorado; the Mother Lode Motel in Bristol, Nevada. Moments of grandeur, too: finding myself on the banks of the Rio Marañon in Bristol, Peru; catching a glimpse of the Blue Ridge Mountains from a suburban driveway in Bristol, Virginia.

In each one, materiality and mystery, Bristol after Bristol after Bristol. I hope you enjoy walking with me between historical and contemporary resonances and connectors, in search of a Coke.

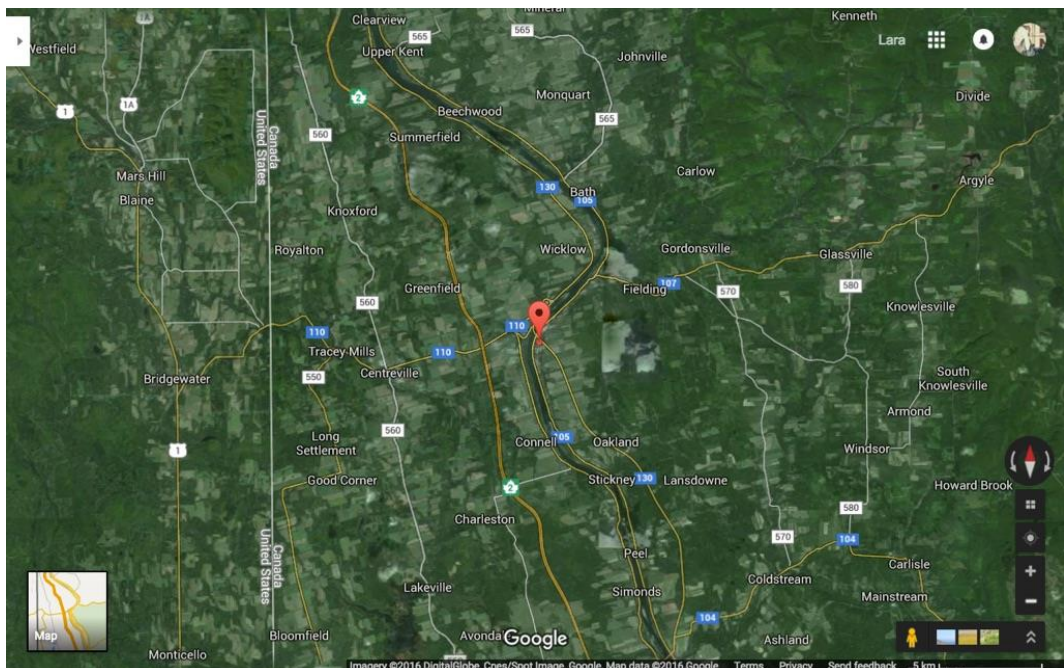

## BRISTOL VILLAGE, NEW BRUNSWICK, CANADA

Start Point: [46°26'36"N67°36'55"W](#)

End Point: Irving Services

Distance: 0.7 miles

You will be on the hard shoulder of Hwy 130, looking into a dip of grass, a line of spruce pine, and a No Entry sign. If it is summer, there will be a rectangle of wild flowers beneath the sign. Turn 180 degrees, and, keeping to the hard shoulder, follow the exit ramp past sculpted median lawns until you reach the junction with Main St. Take a left on Main and walk straight, past The Bargain! Shop and the Post Office on your left, keeping the St. John River to your right. After one block you'll come to the Irving petrol station on your left, just opposite the covered wooden bridge, where you can get your Coca-Cola.

## BRISTOL, WISCONSIN USA

Start Point: [42°32'35"N88°00'58"W](#)

End Point: Country Side Market

Distance: 1.8 miles

You will be at the end of a dirt track, looking out over low farmland. Head west on this track for 0.25 miles until you reach a pink flamingo garden ornament and a red truck. This is the beginning of 176<sup>th</sup> Ave. Walk south on 176<sup>th</sup> Ave, through dense woodland and driveways. After 0.3 miles you will reach Wilmot Rd. Take a right and walk along Wilmot Rd, keeping houses and trees and driveways on your right and vast ploughed brownfield on your left. Keep walking for 1.5 miles until you reach a set of traffic lights. Cross at the lights and the Country Side Market will be on your left, where you can get your Coca-Cola.
